

Molteno Brothers pick Doosan

THE WELL-KNOWN Molteno Brothers farming business, a leading SA producer of fresh pome fruit, has taken three Doosan B25S-5 four-wheel electric forklifts on long-term rental from Goscor Lift Truck Company (GLTC). Abraham Pool, manager of Molteno Brothers cold stores at the historic Glen Elgin farms, says, "We were looking for electric forklifts that would work quickly and efficiently while providing a safe, comfortable working environment for our operators. The Doosan B25S-5 satisfied all these requirements and more." Shane Farren, GLTC regional sales manager, says the bottom line for evaluating any lift truck is simple: "Productivity. And that is where the Doosan B25S-5, and the entire Doosan Pro-5 line, really stands out," he says. "Productivity in an electric truck is a function of three things: speed, control and low energy consumption. All these things have been achieved through a number of exclusive Doosan design innovations."
