

Afripack increases pallet positions with Bendi

PACKAGING GIANT AFRIPACK increased its pallet positions by almost 50% in its new, relocated finished goods warehouse in Durban by using Bendi forklifts from Goscor Lift Trucks (GLTC). "We needed tough and reliable forklifts to work in our new VNA (Very Narrow Aisle) warehouse and after some consideration we went for two Bendi B318 articulated forklifts," says Afripack buyer Kresan Naidoo. "They are not only extraordinarily agile in narrow aisles but they also work just as easily outside as they do inside obviating the need for additional forklifts." Designed to give optimal aisle performance and boasting many salient features, the B318 is capable of storing pallets in 1,8 m aisles offering great space savings over counterbalance and reach trucks. •
