developed for indoor and outdoor use. With its hydrostatic all-wheel drive and independently differential lock it is suited to all surfaces including poor ground or floor conditions. Also, the multidirectional steering enables optimal handling of long and bulky loads and the efficient use of storage space.

The superior High Performance Steering (HPS) steering system of the DQ 45 ensures the shortest changeover time from lengthwise to crosswise drive. In fact, research has shown that compared to conventional steering systems, the forklift enables a 60% faster changeover and, in addition, has up to a 30% smaller turning radius by means of its load wheels.

Goscor Lift Truck KwaZulu-Natal's Dale Rosewall says that the German manufactured Hubtex side loaders have been a great success since being introduced by Goscor into southern Africa. "There is an increasing number of people like John Fourie who are seeing the light in terms of what Hubtex loaders can do for the efficiency of businesses that deal in long and difficult loads," he concluded.
